## Changing a User's Password

Changing a user's password is done by clicking the "Change Password" button in the column corresponding to that user in the table. When the button is clicked, a modal window opens in which you need to set a new password.

Change password Jane

Username:

Jane

New password:\*

6-32 СИМВОЛОВ

Confirm password:\*

6-32 СИМВОЛОВ

SUBMIT

## Creating New Users

Creating new accounts is carried out by the administrator on the User Administration page in the top right menu. "Add Account" opens a form to create a new user. Email, login, and password are mandatory fields. The user can change their password by themselves.

Create a new user

Full name:

John Doe

User login:\*

3-45 символов

Password:\*

6-32 символов

Confirm password:\*

6-32 символов

Email:\*

johndoe@gmail.com

Role:

SUBMIT

## Editing Users

Editing user data is done by clicking the "Edit" button in the column corresponding to that user in the table. When the button is clicked, a modal window opens in which you need to enter the new data.

Edit user Jane

Full name:

Jane Doe

User login:\*

Jane

Email:\*

janedoe@gmail.com

Role:

User

SUBMIT

## User Roles

The system supports the following user roles: regular user, expert, and administrator.

In regular user mode, the following capabilities are provided: uploading files for analysis and viewing reports on the uploaded files. Regular users can see their own reports and reports with open access.

In expert mode, there is the ability to set verdicts for analyzed objects, as well as all the capabilities of a regular user.

A system user with an administrator role has the capabilities of both an expert and a regular user, plus a settings panel for component parameters and user management. The administrator can see the reports of all users.
